

Recycled Rubber Surfacing for Playgrounds

Create a safe, interactive play surface by replacing existing sand or pine chips with environmentally friendly Reclaim recycled rubber surfacing.

A Reclaim surface designer can create a design that will totally transform your play areas.

Bring play areas to life with an educational edge

Create your own individual design or let a Reclaim design consultant suggest a theme. Stars, hopscotch, underwater world adventures, Australian wildlife, a bike or scooter track - the options are endless. Add some 3D fixed or moveable rubber shapes to add interest and fun to your play areas.

Highly skilled rubber installation team

Rest assured that Reclaim's team of surfacing installers have the experience and skill to create a safe, hygienic and colourful play area that children of all ages will love to play on.

Reclaim rubber playground surfacing is poured as a continuous seamless surface on site. The base layer is modified to suit the play equipment and the potential fall height of any structures.

Warranty on product and workmanship

High quality and extremely durable Reclaim recycled rubber surfaces are manufactured from waste car and truck tyres. All Reclaim rubber surfaces come with a full product and workmanship warranty.

All Reclaim rubber surfaces comply with Australian Safety Standards AS/NZS4422:96 and AS/NZS4486.1:97
